QAD Batch Processing Best Practices

ALEX KIM – 32 Soft, Inc.

We all are caught up with thousands things during the day. How can you maximize productivity by leveraging QAD batch processing? Often, this functionality is underused or misused. This presentation will cover best practices in this area and ideas, which you can implement right away.

Climb Aboard the ProDataSets Train

PAUL GUGGENHEIM – Paul Guggenheim & Associates

ProDataSets are one of the major developments in the OpenEdge ABL. Whether you are building an application that uses the advanced UI, browser based, object oriented or procedural-based, they are useful for a number of reasons. Learn how to define complex business logic inside a ProDataSet, create data mapping between the ProDataSet and the database, and associate hooks for custom event procedures.

QAD Product Demo Center

Come to the Product Demo Center and experience live product demonstrations. QAD Consultants will be available for on-demand demos of scheduled products. The informal setting allows for you to ask product questions specific to your needs.

MONDAY (1-5pm)

.Net EAM (Enterprise Asset Management)

Come see the newly updated EAM V12 in full .NET! Learn how you can manage you company's plant and equipment resources, track capital budgets, order and maintain MRO stock, and automatically feed the rest of QAD for finance, purchasing and receiving. With the new .NET UI, managing and reporting never looked easier.

TUESDAY (8:30-12:00pm)

Master / Production Scheduling Workbench

Both the new Master Schedule Workbench and the new Production Schedule Workbench will be here for a hands-on view. Drill into the new world of easy access, full color, drag-and-drop control. This may be the only screen your schedulers will need to run their day to day scheduling.
